

ERN-RND—Survey research priorities

Authors: Carola Reinhard^{1*}, Thomas Klockgether², Bernhard Landwehrmeyer³, Ludger Schöls⁴, Holm Graessner¹ on behalf of the ERN-RND network

¹Institute of Medical Genetics and Applied Genomics, University Hospital Tübingen and Centre for Rare Diseases Tübingen, Germany

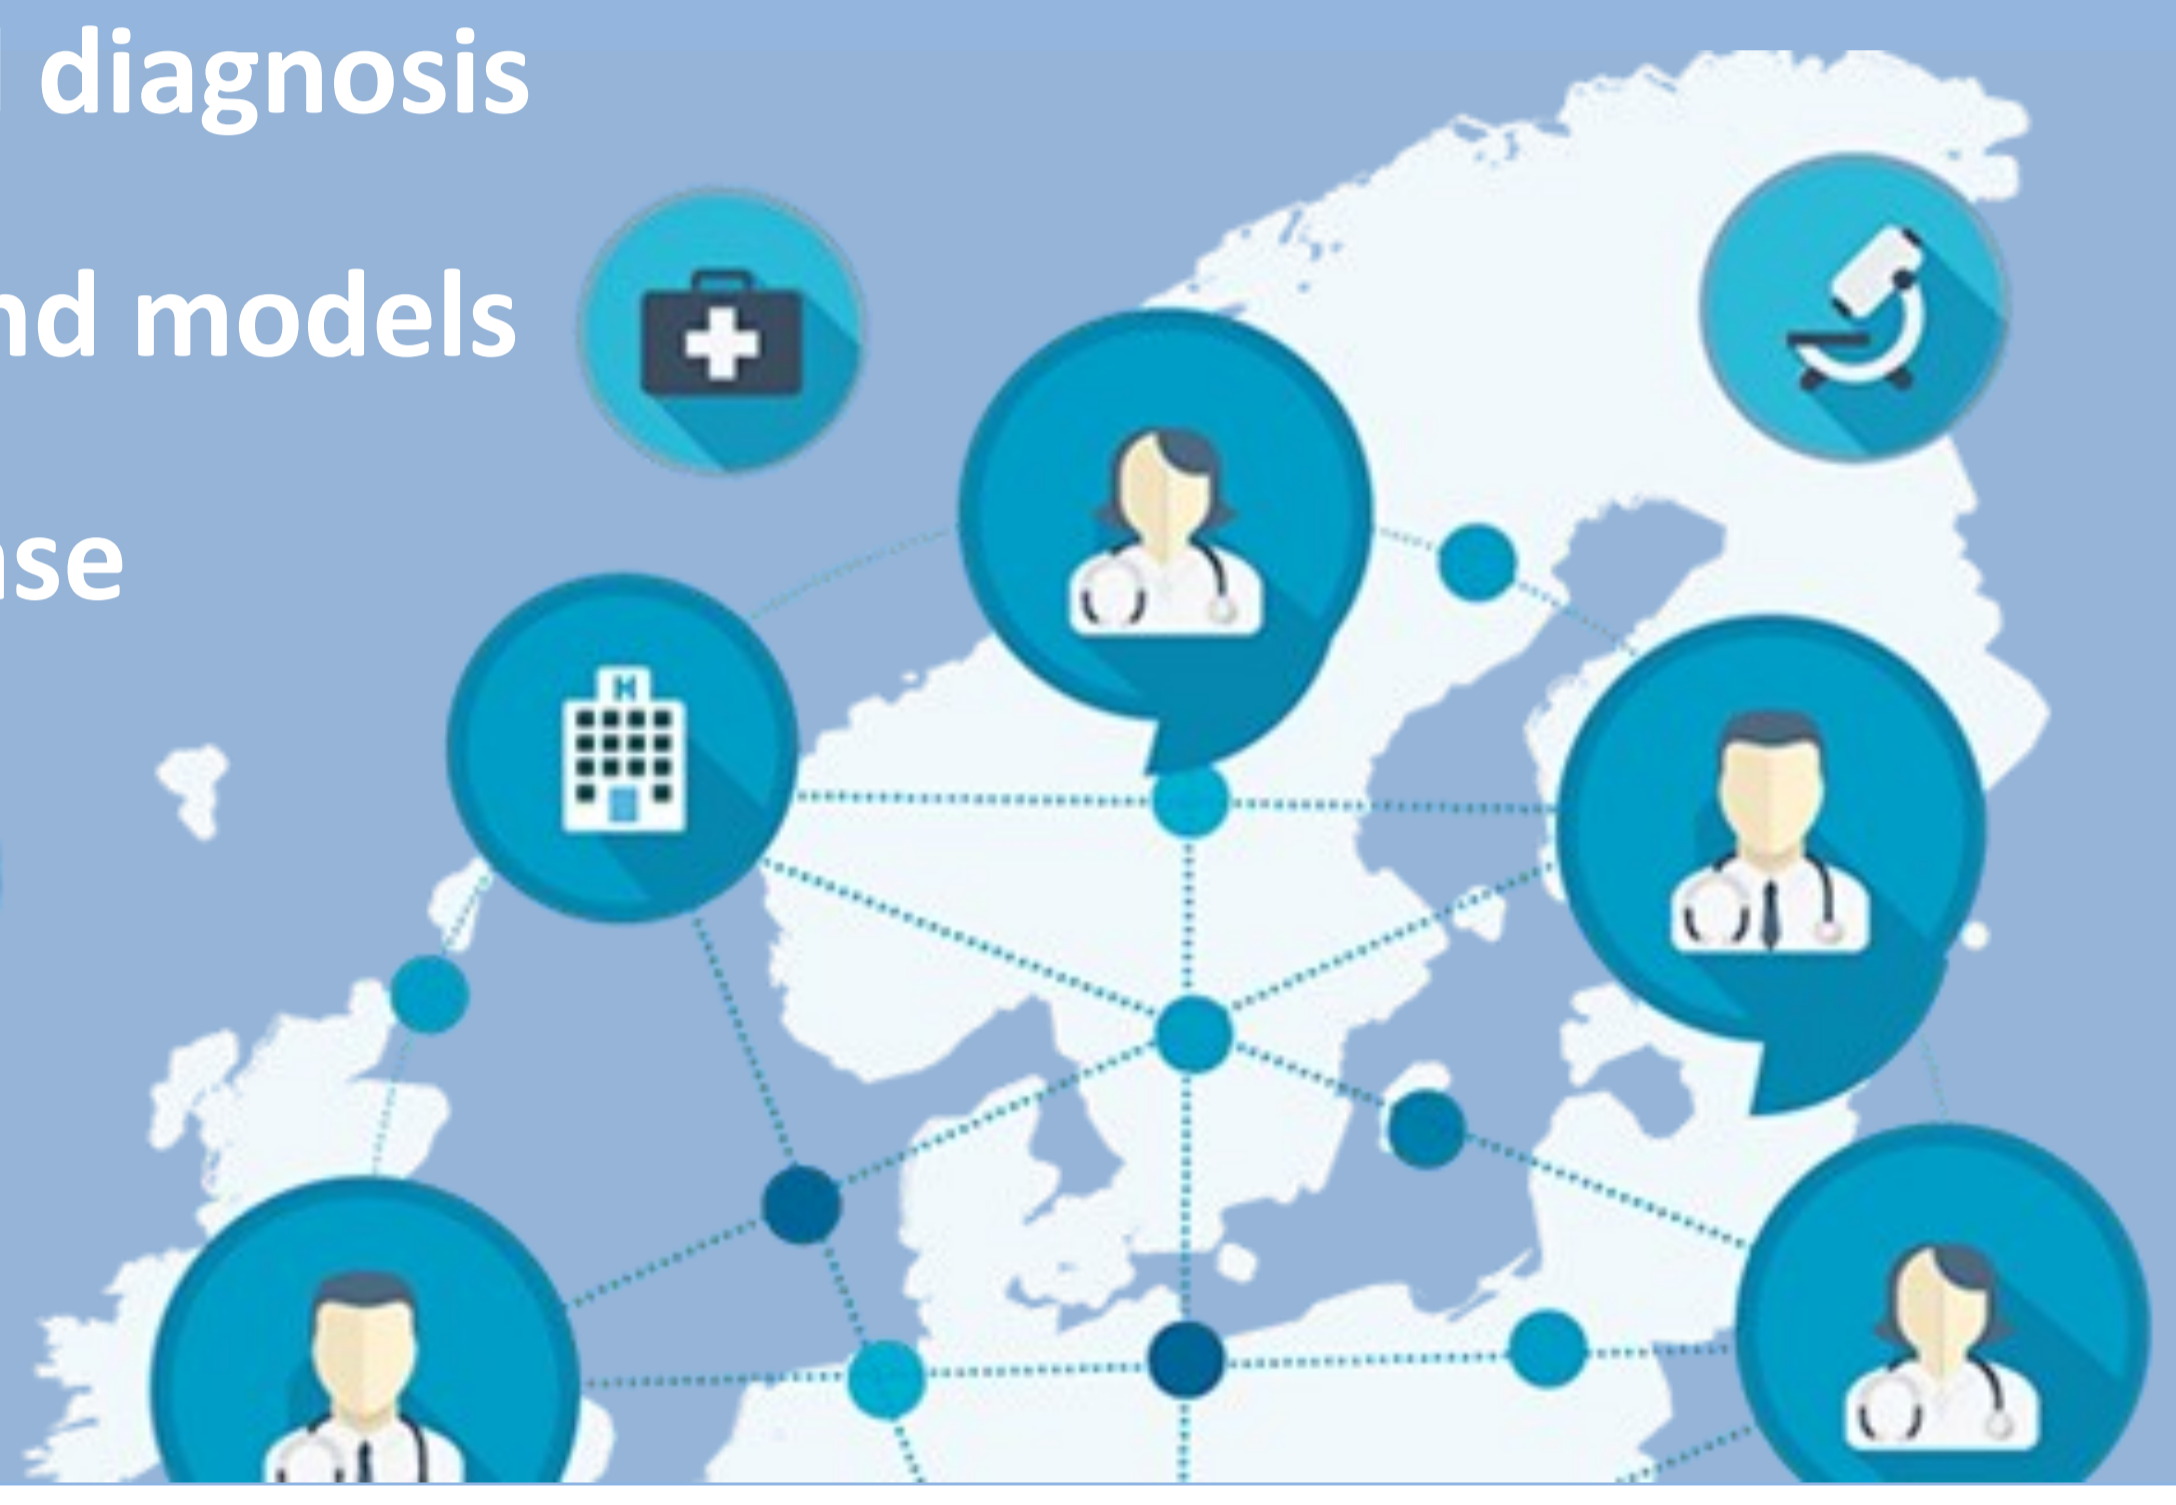

²Department of Neurology, University Hospital Bonn, Germany

³Department of Neurology, University Hospital Ulm, Germany

⁴Centre of Neurology, University Hospital Tübingen and Centre for Rare Neurological Diseases Tübingen, Germany

Please rate (on a scale from 1 to 5) the importance of the following research topics

- Healthcare and social care
- Developing therapies, preventive strategies
- Disease definitions and diagnosis
- Disease mechanisms and models
- The origins of the disease

According to
 JPNP Research Strategy: published 2012
 UK Medical Research Council
 ISSN 2049-3290

Numbers

A total of 83 participants answered the survey.

Disease group	N respondents
Ataxia/HSP	24
Atypical Parkinsonism/genetic PD	13
Dystonia, Paroxysmal Disorders, NBIA	16
Frontotemporal Dementia	5
HD and Chorea	11
Leukodystrophies	5
Unspecified	9
Stakeholder group	N respondents
Clinicians/Scientists/other professionals	74
Patient representatives	9

Research priorities differ between the ERN-RND disease groups

Research priorities differ between the different stakeholders
