

Getting started the EU Login App

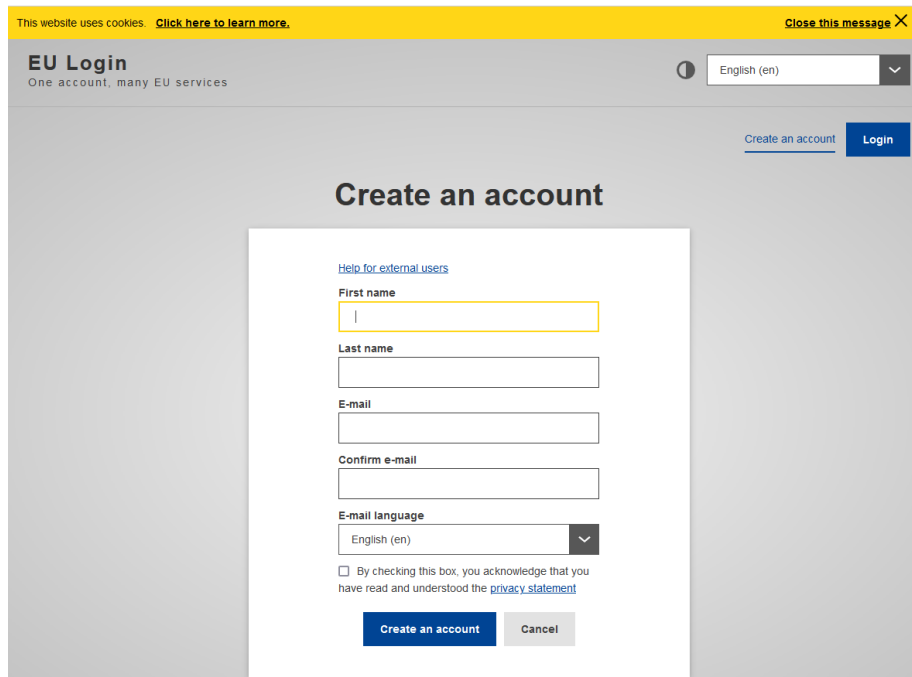

Requirements:

- Computer (notebook, tablet) connected to WiFi
- Mobile phone

STEP 1 – CREATE YOUR EU-ACCOUNT

1. To set up the EU Login App, you must access your EU-Login page on a device other than your phone (computer/tablet):

<https://webgate.ec.europa.eu/cas/login>

What is the EU-Login?

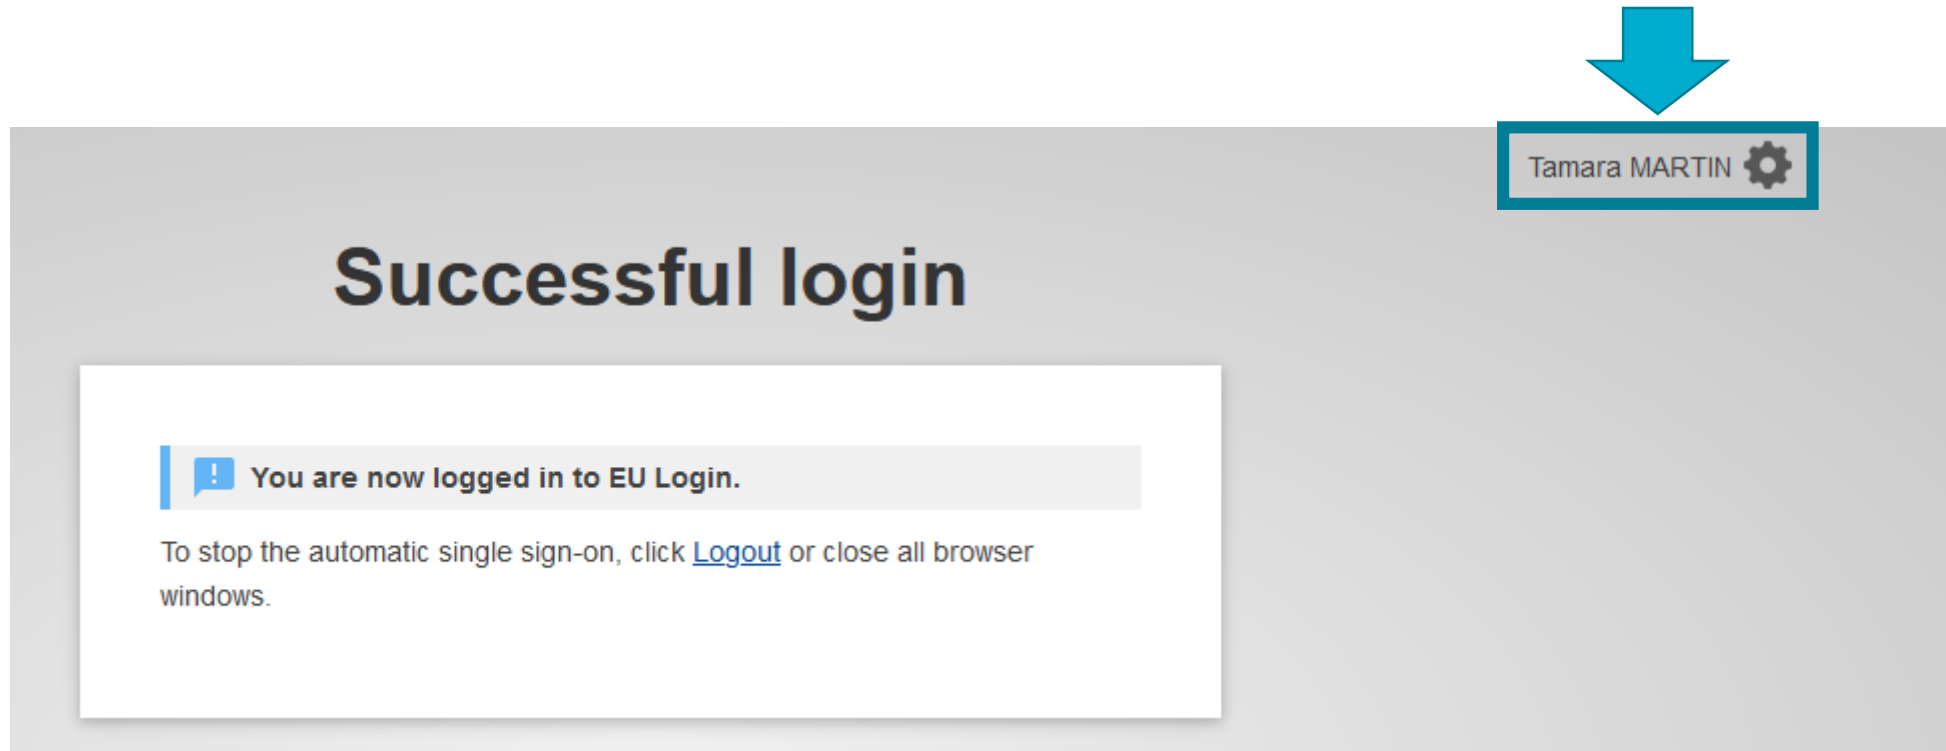

One Login – many EU services. Not only CPMS, but also the ERN Collaborative Platform uses this login.

If you do not yet have an EU-Login, you will be asked to create one using the link above.

STEP 1 – CREATE YOUR EU-ACCOUNT

4. Go to „My Account“ to set up 2-factor authentication

The screenshot shows a user interface for a successful login. At the top right, a blue arrow points to a dropdown menu containing the name "Tamara MARTIN" and a gear icon for settings. The main heading is "Successful login". Below it, a white box contains a blue notification icon and the text "You are now logged in to EU Login." followed by instructions: "To stop the automatic single sign-on, click [Logout](#) or close all browser windows."

STEP 1 – LOG INTO YOUR EU-ACCOUNT

„Manage my mobile device“ to set up verification via EU-Login Mobile App.

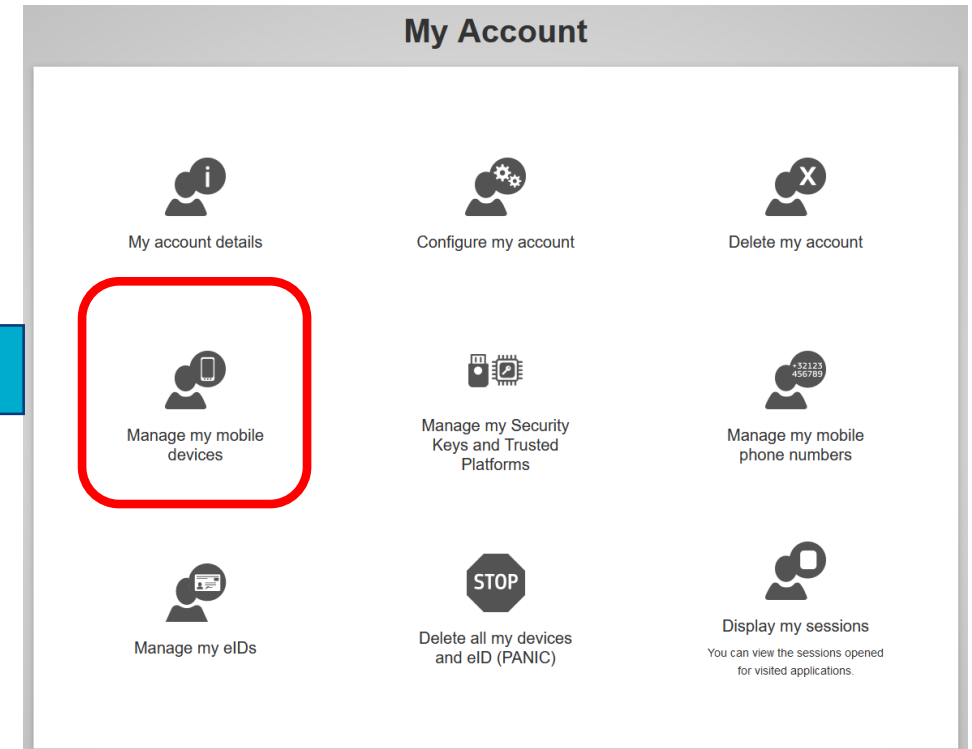

→ Login via **PIN code** (most convenient)

→ Login via **QR Code** (works offline)

Only with EU-Login app reliable login in real-time guaranteed!

You will be asked to set a 4-digit PIN code now. This PIN will be asked in the app every time you want to login to CPMS (to confirm your login attempt).

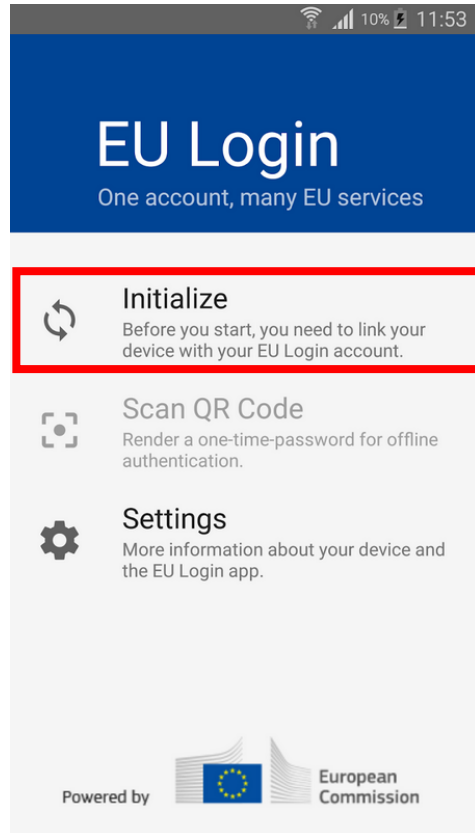

STEP 2 – DOWNLOAD EU LOGIN APP

- Make sure your Notebook/Desktop PC is logged in EU Login profile
- Phone → Download „EU Login“ App from App Store (Android play or apple store) – it is free, of course!
- Once download is completed, open the app.

STEP 3 – INITIALIZE APP

- To connect app to EU account: select initialize in app on your phone:

Your computer screen will now show a QR-Code, and the EU-Login app will ask you to scan this code with its own QR-Scanner which opens automatically

You will now need to give the 4-digit PIN you chose in your profile to confirm this action. Your computer screen should notify you that the initialisation has worked – if not, restart both the app and the browser tab and re-select initialisation in the app.
